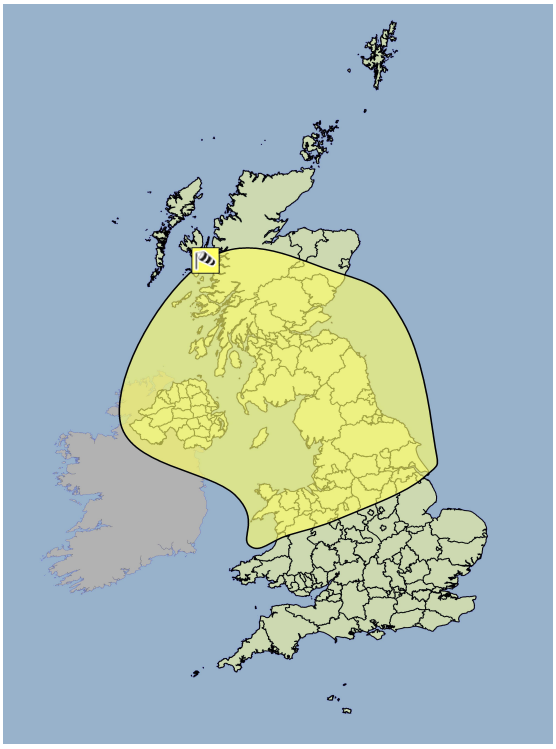
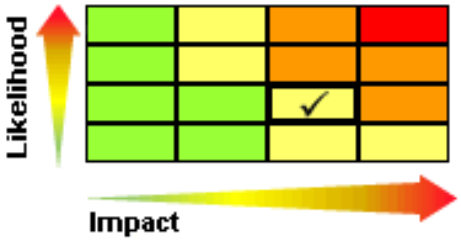
# National Severe Weather Warning Service





**Chief Forecasters Assessment**
A very strong west to southwest airstream across much of the UK will be particularly strong across parts of Scotland, Northern Ireland, Wales and the northern half of England during Saturday afternoon and evening. Here, exposed coasts and hills, as well as some areas to the lee of higher ground, can expected some potentially damaging gusts.

The Met Office have issued a **Yellow Warning** of **Wind**

Valid from **11:40 on Sat, 05th Dec 2015** until **06:00 on Sun, 06th Dec 2015**

Southwesterly severe gales are expected at times during the rest of Saturday before winds start to ease during the early hours of Sunday. Gusts in excess of 60 mph are expected for some. The highest gusts are expected over high ground in northern England, Scotland and north Wales and in Irish Sea coastal areas where gusts may exceed 70 mph.

Please be aware of the likelihood of travel disruption on roads and to rail and ferry routes. Winds may be strong enough to bring down trees and perhaps cause damage to buildings and other structures. A period of heavy rain will also affect much of the area, for which separate warnings are in force.

**For more details please go to:**
